

ENVIRO PLUS LINE Holey Board

Description

Enviro Plus Holey Board is an EPS insulation that features factory-made holes - typically, 6 or 8 holes per board. **The benefits of Holey Board are its energy efficiency, cost effectiveness, durability and endurance.**

More often than not, it is the preferred choice among roofing contractors for use in insulated concrete roof decks since it is lightweight, yet strong enough for the most demanding job.

ISO Quality

E-Plus Holey Board is produced in an ISO 9001-certified manufacturing facility using state-of-the-art laminating equipment. Its EPS core meets or exceeds ASTM C578 Standard Specification for Rigid, Cellular Polystyrene Thermal Insulation. The product's dimensional stability and compressive strengths are subject to stringent ISO quality-control protocols.

Applications

E-Plus Holey Board can be easily sloped within a roof system to ensure maximum drainage, and its unprecedented low moisture absorption inhibits warping, cracking and buckling.

Furthermore, it can be fashioned into a great variety of sizes and thicknesses to meet any specific need.

When encapsulated within insulating concrete, it helps to lessen the overall weight of a home or building.

Call your Tri State Foam representative at 1-800-277-0967 for installation instructions and more information about this Enviro Plus construction product.
