

What Tri State Foam Can Do For You

For almost three decades, Tri State Foam has served as a trusted partner to their clients. Our state-of-the-art equipment manufactures EPS foam products that not only decrease your costs, but also give you an economical edge in the marketplace.

The Competitive Advantage of Using EPS

By using EPS, you gain a greater R value per dollar spent than you would get with other building products. At the same time, EPS meets new building codes and contributes toward LEED credits. Among the many advantages EPS offers you are:

- A longer life cycle
- 50% recycled material
- A product that is itself 100% recyclable
- Materials that have no CFCs, HCFCs or formaldehyde
- A product that is both water and flame resistant

Conversion Made Easy

Tri State Foam also has engineers on staff that can help you make the conversion from traditional building materials to EPS products. They can assist you in understanding the advantages of going with EPS over other processes, as well as aid you in calculating the measurable differences on each building project.
