

## Welcome to Tri State Foam

Offering the most advanced and progressive way to build and insulate any structure or foundation, Tri State Foam Products Inc. is a leading manufacturer and fabricator of Expanded Polystyrene (EPS) foam.

EPS, a rigid, yet lightweight foamed plastic, is a cost-savings method that is also safe, sturdy and environmentally friendly.

By using EPS, you are bringing to your construction project a proven solution to the problem of cost-effective insulation in the 21<sup>st</sup> century - one that not only decreases your costs, but also is safer and more resistant to the ravages of fire, water and age than more traditional insulation systems.

Let the engineers at Tri-State Foam be your resource for advice, direction and support in the use of our many EPS products.

### The Tri State Foam Advantage:

- ISO certified
- Increase profit margins by decreasing contractor cost
- Meet new building codes and contribute toward LEED credits
- All products available from one source
- Trused partner
