

Architecturally-Shaped EPS

Using a high-tech CAD/CAM-driven computer cutter, Tri State Foam can fabricate a wide variety of custom foam shapes for use as architectural enhancements. Popular custom foam shapes, commonly used as design elements on buildings and signage, include:

- Round and fluted columns
- Cornices
- Archways
- Quoins
- Parapet caps and decorative bans

EPS shapes have proven very economical in comparison to wood or concrete products, often providing a 50 to 75 percent cost savings.

Among the other advantages of using EPS for your custom foam shapes are:

- Low material and installation costs
- A wide range of shapes and sizes
- Ease in handling and application
- Lead time reduction through quick manufacturing & shipping response times

Technical Support: As a service to our customers, Tri State Foam's engineers and technicians can assist an architect, owner or applicator in the formation of design ideas for all types of applications.

Customer Service: At Tri State Foam, we believe service, excellence and prompt delivery are the most important supports we can provide for our customers.
